

FCC,
Please reject NAB's petition 04-160. Satellite radio is wonderful and has made me a better and happier person because of the music, news, and diverse programming. AM/FM worked great for its time, but we are now in the digital age. Satellite radio features (lots of channels, digital signal, subscription in lieu of commercials) are the future. If NAB companies want to compete let them do it by making better digital broadcast technology, rather than try to get protection from the government to keep their dinosaur businesses intact. A free market economy is what the USA is about. Let competition work!
